

What now?

Marguerita Lightfoot, Ph.D.
Associate Professor, UCSF Department of Medicine

National Epidemic

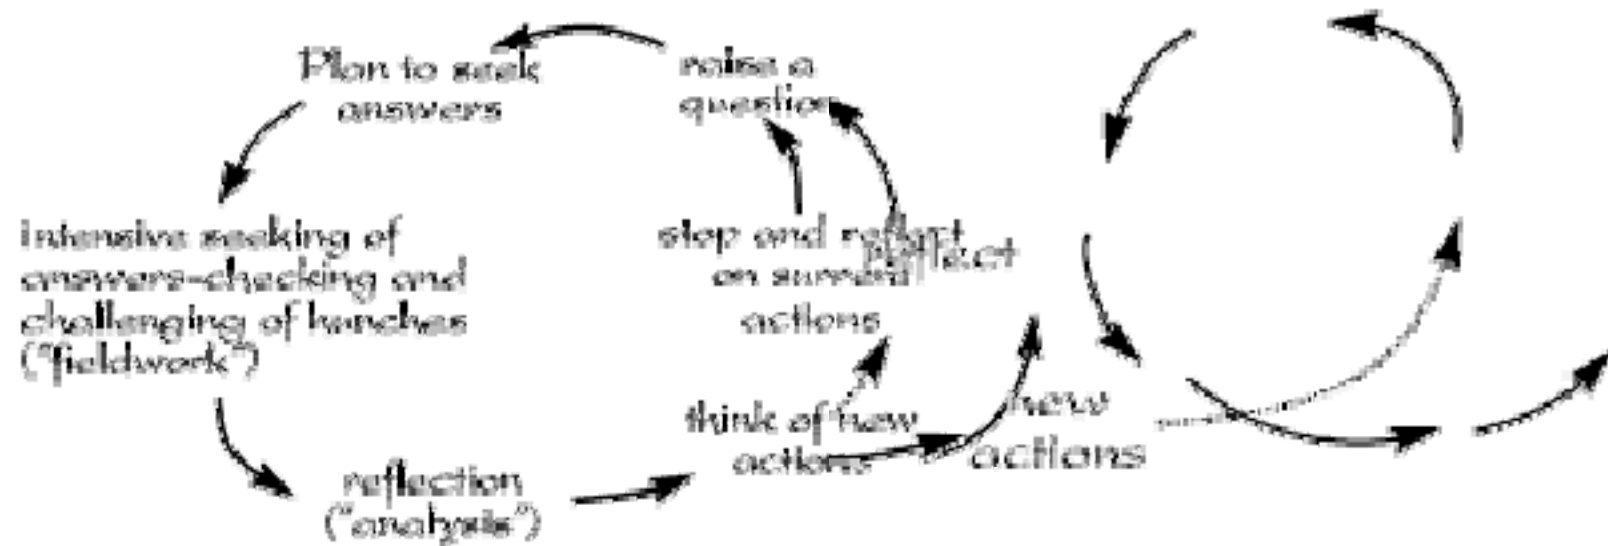

- 1,039,000 to 1,185,000 persons living with HIV infection in the U.S.
- 24-27% undiagnosed and unaware of their HIV infection
- 40,000 new infections annually
- HIV remains a leading cause of death among persons 25 to 44 years old, particularly among Black and Hispanics

Preventing HIV

- One more to add Leroy...
- Great research through partnership

What do you do now?

What do you do now?

- How does this impact your work...
- Who do you need to tell...
- What do you need to change...
- What additional information do you need...
- What questions do you have...
- With who and how do you partner...

Let us help
