Domestic

Multi-Level Prevention in Culture and Context for Latino MSM (Diane Binson, PI)

<http://caps.ucsf.edu/research/portfolio/2008/Binson-LatinoMSM.pdf>

This is a culturally sensitive, multi-level HIV prevention program for Latino men who have sex with men (MSM) who do not self-identify as gay. The program addresses critical aspects of HIV prevention both for the individual and for the environment of public places where sex takes place. The project is a collaboration between CAPS and the City of Berkeley, CA AIDS Office, Department of Public Health.

Social/Sexual Networks and HIV Risk: Men of Color (Kyung-Hee Choi, PI)

<http://caps.ucsf.edu/research/portfolio/2008/Choi-MSMNetworks.pdf>

This study seeks to understand HIV risk behaviors by examining how social discrimination impacts sexual risk among MSM of color. The study describes sexual partnership patterns and explains the association between social discrimination, social networks, sexual partnerships and HIV risk among African American, Asian and Pacific Islander, and Latino MSM in Los Angeles, CA.

State Minority AIDS Project (George Rutherford, PI)

<http://caps.ucsf.edu/research/portfolio/2008/Rutherford-SMAP.pdf>

This project creates and disseminates systematic reviews on HIV prevention interventions and maintains a database of the best evidence of interventions conducted with people of color. The project prepared a report focusing on effective interventions for MSM of color, and updated a systematic review of interventions for Latinos.

International

Chemoprophylaxis for HIV Prevention in Peruvian and Ecuadorian Men

(Kim Page-Shafer, PI)

<http://caps.ucsf.edu/research/portfolio/2008/Shaffer-PREPPPeru.pdf>

This study is conducting a randomized blinded clinical trial evaluating the safety and efficacy of chemoprophylactic therapy using once daily tenofovir 300 mg to prevent HIV-1 acquisition in high-risk uninfected MSM in Lima, Iquitos in Peru and Guayaquil in Ecuador.

NIMH Collaborative HIV/STD Prevention Trial in Peru (Susan Kegeles, PI)

<http://caps.ucsf.edu/research/portfolio/2008/Kegeles-Peru.pdf>

This is a randomized study to test a community-level popular opinion leader (CPOL) prevention intervention in five international sites. UCSF collaborates with UCLA and Cayetano Heredia University in Lima to test the intervention among men and women in lower income neighborhoods in Lima, Trujillo and Chiclayo, three coastal cities in Peru.

CAPS Fact Sheets

<http://caps.ucsf.edu/pubs/FS>

What are US Latinos' HIV prevention needs?

What are the HIV prevention needs of Mexican immigrants in the US?

What is the role of rapid testing for US-Mexico border and migrant populations?
