

C&T 12-Month Questionnaire

AIDSCAP/WHO/CAPS Counseling and Testing Efficacy Study:

Before we get started, I would like to explain to you how the interview works. In terms of its content, the interview is very similar to the one you completed when you enrolled and/or came in for your 6-month follow-up. Many questions will be asked again that were asked before. This is out of necessity to ensure the strength of the research study you are participating in. As the screener described to you, your participation in the interview and every aspect of the study are completely voluntary. You may skip any questions that you prefer not to answer, but we would appreciate your cooperation. You may also ask me to clarify questions if you don't understand them or decide to stop the interview at any time. Finally, all the information that you provide for the study is kept completely confidential. Your responses to our questions are identified only by number, never by name.
