

**Methods Core Monthly Seminar Evaluation Form**

Presenters: Stephanie Sapp, MA, PhD candidate & Meghan Morris, PhD, MPH  
 Topic: **Spontaneous HCV Clearance in IDU: Estimating Variable Importance Measures with Interval Censored Outcomes**

Date: Friday, November 15, 2013

Please check or place an X in the appropriate boxes in the table below.

Please rate the instructors'	Poor	Fair	Good	Very Good	Excellent	N/A
knowledge of the subjects covered in today's presentation					X	
ability to convey complex topics clearly					X	
receptivity to audience members' questions					X	
pacing of information delivery					X	
preparation					X	
enthusiasm for presenting					X	
The clarity of seminar notes/slides/examples was:					X	
The relevance of what you learned for your research is:					X	
Your overall evaluation of this seminar is:					X	

How will you use what you learned today in your research or other HIV-prevention research activities?

The things I liked best about this presentation were:

The things I liked least about this presentation were:

Please rate the instructors'	Poor	Fair	Good	Very Good	Excellent	N/A
knowledge of the subjects covered in today's presentation					X	
ability to convey complex topics clearly			X			
receptivity to audience members' questions			X			
pacing of information delivery					X	
preparation					X	
enthusiasm for presenting			X			
The clarity of seminar notes/slides/examples was:					X	
The relevance of what you learned for your research is:	X					
Your overall evaluation of this seminar is:			X			

How will you use what you learned today in your research or other HIV-prevention research activities?

*I won't*

The things I liked best about this presentation were:

*Interesting exercise, clearly presented*

The things I liked least about this presentation were:

*Lack of detail (b/c this group wants detail)  
 (but that was remedied by looking at her paper)*

### Methods Core Monthly Seminar Evaluation Form

Please check or place an X in the appropriate boxes in the table below.

Please rate the instructors'	Poor	Fair	Good	Very Good	Excellent	N/A
knowledge of the subjects covered in today's presentation				✓		
ability to convey complex topics clearly			✓			
receptivity to audience members' questions					✓	
pacing of information delivery					✓	
preparation					✓	
enthusiasm for presenting					✓	
The clarity of seminar notes/slides/examples was:						
The relevance of what you learned for your research is:			✓			
Your overall evaluation of this seminar is:				✓		

How will you use what you learned today in your research or other HIV-prevention research activities?

*will consider survival outcomes more carefully in analyses.*

The things I liked best about this presentation were:

*100% clear slides; math explanation afterwards (the speaker's gracefulness in being willing to walk us through the math)*

The things I liked least about this presentation were:

*Lack of some math & explanations in slides.*

The relevance of what you learned for your research is:				X		
Your overall evaluation of this seminar is:				X		

How will you use what you learned today in your research or other HIV-prevention research activities?

will use causal analysis  
 might use TALLE

The things I liked best about this presentation were:

example of causal analysis  
 pointer to TALLE method

The things I liked least about this presentation were:

shortage of technical details  
 but it may have been hard to provide that
